## ALT 3

# ALT 3 CHAIR FEATURES

## Seat height adjustment

To lower height, lift the lever at the right front of the seat while seated. To raise the height, remove your weight from the seat while lifting the lever.

## Arm height

On adjustable T arms, activate the button on the side of each arm and raise or lower to desired height. Chair arms can also be adjusted for angle pivot and depth by simply moving them to the desired position.

## Back-tilt tension

To adjust the back-tilt tension, use the handle at the right of the seat. To increase tilt tension, turn the handle clockwise. To decrease, turn the handle counter-clockwise.

## Back flex

To limit the back flex range, lean back to the desired flex angle and lift the lever to the left of the seat. To restore maximum back flex, push the lever down.

## Seat depth

To adjust the Alt 3 chair for your leg length, pull outward on the handle near the right of the seat. With the handle pulled, slide the seat forward or back to the depth comfortable for you. It may be easier to adjust seat depth while standing next to the chair rather than while seated.

## ALT 3

Featuring comfortable mesh backing, this chair provides flexibility, comfort and lumbar support. Complete with adjustable T-arms, five-star base in polished aluminum and upholstered seat and mesh backing, this chair is cutting edge in comfort and functionality.
